ABSTRACT

This bibliography contains 108 citations (some with annotations) for selected rural education literature entered into the AGRICOLA database between January 1979 and March 1990. The publications include books, commission papers, journal articles, legal documents, reports, and academic theses. Some of the topics covered in the bibliography as they relate to rural education are: (1) alcohol and drug use; (2) educational reform; (3) community schools; (4) educational and occupational aspirations of rural youth; (5) economic development; (6) rural development; (7) school finance; (8) health care; (9) educational partnerships; (10) vocational education; (11) adult education; and (12) extension education. Entries are organized by title and are indexed by author. The document includes information about document delivery services to individuals and libraries, which are provided by the National Agricultural Library. (KS)

Bibliographies in the Quick Bibliography Series of the National Agricultural Library, are intended primarily for current awareness, and as the title of the series implies, are not indepth exhaustive bibliographies on any given subject. However, the citations are a substantial resource for recent investigations on a given topic. They also serve the purpose of bringing the literature of agriculture to the interested user who, in many cases, could not access it by any other means. The bibliographies are derived from computerized on-line searches of the AGRICOLA data base. Timeliness of topic and evidence of extensive interest are the selection criteria.

The author searcher determines the purpose, length, and search strategy of the Quick Bibliography. Information regarding these is available upon request from the au[illegible]rche[illegible]

Copies of this bibliography may be made or us[illegible] [illegible]thout prior approval. The inclusion or omission of a particular publication or citation may not [illegible] [illegible] orsement or disapproval.

DOCUMENT DELIVERY SERVICES TO INDIVIDUALS

The National Agricultural Library (NAL) has a unique responsibility to supply copies of agricultural materials not found elsewhere.

Filling requests for materials readily available from other sources would divert NAL's resources and diminish its ability to serve as a national source for agricultural and agriculturally related materials. Therefore, NAL should be viewed as a library of last resort and individuals should submit requests first to local or state sources prior to sending to NAL. In the United States, possible sources are public libraries, land-grant university or other large research libraries within a state. Individuals in other countries should submit requests through major university, national, or provincial institutions.

If the needed publications are not available from these sources, the requests may be submitted to NAL with a statement indicating their non-availability. Submit one request per page following the instructions for libraries below.

NAL's DOCUMENT DELIVERY SERVICE INFORMATION FOR THE LIBRARY

The following information is provided to assist your librarian in obtaining the required materials.

LOAN SERVICE – Materials in NAL's collection are loaned only to other U.S. libraries. Requests for loans should be made through local public, academic, or special libraries.

The following materials are not available for loan: serials (except USDA serials); rare, reference, and reserve books; microforms; and proceedings of conferences or symposia. Photocopy or microform of non-circulating publications may be purchased as described below.

DOCUMENT DELIVERY SERVICE – Photocopies of articles are available for a fee. Requests must be made through local public, academic, or special libraries. The library should submit a separate interlibrary loan form for each article or item requested. If the citation is from an NAL database (CAIN/AGRICOLA, *Bibliography of Agriculture,* or the NAL Catalog) and the call number is given, that call number should be listed in the proper block on the request form. Willingness to pay charges must be indicated on the form. Compliance with copyright law or a statement that the article is for "research purposes only" must be included on the interlibrary loan form. Requests cannot be processed without these statements.

Charges:

- Photocopy, hard copy of microfilm and microfiche – $5.00 for the first 10 pages or fraction copied from a single article or publication. $3.00 for each additional 10 pages or fraction.
- Duplication of NAL-owned microfilm – $10.00 per reel.
- Duplication of NAL-owned microfiche – $ 5.00 for the first fiche and $ .50 for each additional fiche per title.

Billing – Charges include postage and handling, and are subject to change. Invoices are issued quarterly by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. Requesters are encouraged to establish deposit accounts with NTIS. *DO NOT SEND PREPAYMENT.*

Extract: Data were collected on 1981 from 4,859 junior and senior high school students living in two counties in southern Georgia to examine the relationship of peer group influence and psychosocial identification with the frequency of drug use. Practically all of the students in grades 8 through 12 in two study counties were interviewed in controlled group sessions during regularly scheduled school hours. All of the interviews were conducted simultaneously in each selected school to prevent biasing of responses due to the diffusion of study contents among student participants. Information regarding the type and extent of drug use was collected from the students as well as peer group relationships and psychosocial identification with various groups. These data provided the opporunity to examine the merits of a theoretical perspective developed from selected components of differential association and differential identification theories.

Extract: The overall objective of this paper is to provide a base for further research on problems and issues in rural school finance by examining Pennsylvania's rural school districts. Our specific objectives are threefold. First, we summarize briefly previous research on enrollment change between the 1970-71 and 1976-77 school years in Pennsylvania's urban and rural school districts. Second, enrollment change in these school districts is related to change in district fiscal characteristics. Third, we suggest some ideas for further research on the problems of financing rural school districts, especially in light of the enrollment changes occurring in these districts.

The impact of property tax relief on education in rural areas.
Debertin, D.L. ; Clouser, R.L.~Pagoulatos, A. Fargo : North Dakota State University. North Central journal of agricultural economics. July 1984. v.

6 (2). p. 1-11. Includes 18 references. (NAL Call No.: HD1773.A3N6).
Extract: This paper examines the differential impacts of property tax relief on rural, suburban and urban schools in Indiana. The property tax relief plan implemented in Indiana reduced the correlation between educational spending and assessed valuation when both are measured on a per pupil basis. Other socioeconomic variables, such as family income, continue to be important deteminants of spending levels in Indiana.

0048
Impacts of declining enrollments on educational expenditures in rural areas.
Debertin, D.L. ; Pagoulatos, A. Urbana, Ill., Illinois University. Dept. of Agricultural Economics. North Central journal of agricultural economics. Jan 1980. v. 2 (1). p. 25-30. 9 ref. (NAL Call No.: HD1773.A3N6).
Extract: Results suggest that declining enrollments have led to increased per pupil expenditures in rural school districts. Increased costs are primarily due to decreases in pupil/teacher ratios. The state aid distribution formula in Indiana does a better job of compensating urban schools for these cost increases than it does for rural schools.

Extract: Data focused on marijuana use were collected in 1981 from 4,859 high school students living in two counties in southern Georgia. The data were used to test a facilitative-constraint model developed from selected components of differential association, differential identification, and social control theories. Regression analysis was used to identify the factors that were predictive of frequency of marijuana use. Discriminant analysis was used to compare "users," "experimenters," and "nonusers" on the basis of factors chosen to represent each dimension of the theoretical perspective. The findings demonstrated that the theoretical model was useful in predicting the frequency of marijuana use and for correctly classifying students into appropriate user categories.
